

RAMPMASTER

5,000 GALLON

e-electric

ZERO Emissions / ZERO Fuel Costs

Battle Motor Chassis
240kW Battery Pack
150 Mile Expected Range

BATTLE MOTOR'S DIGITAL DASH

Effortlessly provides easy-to-read actionable data, diagnostics, and access to service manuals at the touch of a button!

BORGWARNER CASCADIA MOTION MOTOR

With billions of miles of proven reliability, Cascadia Motion's HVH410-150 motor is supported by the largest independent electric motor test and R&D facility in North America. Battle Motors is proud to work with industry leading, strategic partners.

PLUG IN – FULL ELECTRIC

~12hr charge time with level 2 AC slow charger (9.6kW-19.2kW). ~2-4hr charge time with level 3 DC fast chargers (50kW-175kW). Standard J1772 CSS1 charge port.

PREMIUM SAFETY TECHNOLOGY MOBILEYE 8 CONNECT™

Battle Motors has partnered with Mobileye, a global leader in advanced driver assistance systems whose technology helping prevent collisions and improve driver performance. Battle Motors is committed to making its vehicles safe and will make the Mobileye 8 Connect™ a standard safety feature in all vehicles, utilizing the most advanced technology to prevent and mitigate collisions.

ENHANCED BATTERY PROTECTION AND SAFETY

State of the art battery cooling is achieved through a roof-mounted battery chiller. The system also continuously monitors battery temperature and load through various sensors to maintain optimized battery utilization.

eMS

Along with the benefits of being full electric, Rampmaster is proud to incorporate our "electric management system". eMS will continue to save on motor wear and electric utilization all while eliminating a plethora of valves and other labor-intensive components which drive operating costs and overall complexity.

Parts Eliminated!

- HEPC
- Primary Valve
- Secondary Valve
- Venturi
- Rate of Flow
- Flow Control Servo
- Bypass Servo
- Pilot Valve
